- 8 **Key Findings**

The Client

Insight HR provides flexible, customized HR **solutions/consultations** for **small businesses and nonprofits** that need expert HR support without hiring full-time staff. Their services range from HR needs **analysis, recruitment, and performance management** to HR communications and policy updates.

Project Overview

Redesigning Insight HR's website to enhance the user experience. The **primary goal is to improve usability and navigation for their target audience: small organizations, startups, and nonprofits**. The website should better communicate Insight HR's value proposition and support its strategic objectives.

Improve Website Usability

Enhance User Engagement

Communicate Value Proposition

Design Process

Over the course of this project, I worked through a structured timeline that **began in the summer with client meetings** and once class began **proposal drafting**, and **instructor consultations**. I developed and **refined the project proposal**, **gathered feedback**, and **initiated research methods** such as surveys, content audits, and tree testing. I **analyzed competitor websites and completed detailed content audits**.

Research Methods

Surveys

Content Audit

Tree Testing

Comparative Analysis

Surveys

Participants

- Majority: Students: **45.5%**
- Design Professionals: **27.3%**
- HR and Small Business Representatives: **27.3%**
- **(Total Responses: 13)**

Familiarity with HR Websites

- **54.5%:** Never used HR service websites.
- **36.4%:** "Not familiar" with HR websites.

Usability Challenges

- Lack of clear information about services: **45.5%**
- Difficult navigation: **18.2%**

Surveys

User Experience Ratings

- Most users rated HR websites as **“Fair” or “Poor.”**
- Clear service descriptions (**63.6%**) and contact information are priorities.
- Navigation: Rated as **“Neutral” to “Somewhat easy.”**
- Content Clarity & Visual Design: **Rated low**

Insight HR Website Feedback

- Intuitive navigation: **63.6%**
- Simplified service descriptions: **27.3%**

Key Findings

ACTIONABLE CHANGES

Redesign navigation structure, break down content, and add CTAs or contact options for ease of use.

PRIMARY FOCUS AREAS

Simplify navigation, clarify service descriptions, improve visual design, and add interactive features.

Content Audit

Scope

A detailed audit of Insight HR's current website and 3 competitor sites

Information to collect

Evaluated Insight HR's website for **clarity**, **relevance**, and **usability**, and to identify areas for improvement to enhance user engagement and experience.

Content Audit (Home Page)

Key Message

Introduces the company, provides contact info, and links to main sections

Strengths

Provides essential information in a straightforward way, making basic info easy to find

Weakness

Lacks a strong call-to-action (CTA) and visuals to engage visitors

Recommendation

Add a prominent CTA (e.g., **“Contact us for a consult”**) to guide users. Consider using client testimonials to build credibility and engagement.

Content Audit (About Page)

Key Message

Describes Insight HR's approach to custom HR solutions for small businesses and nonprofits.

Strengths

Clear and tailored messaging that outlines Insight HR's unique value.

Weakness

Contains repetitive "more" buttons, making the navigation feel redundant. Lacks engaging elements like success stories.

Recommendation

Remove or replace "more" buttons with in-line links or a smoother page transition. Add testimonials or case studies to showcase success and build trust.

Content Audit (Service Page)

Key Message

Provides a comprehensive list of HR services and a la carte offerings (specific services)

Strengths

Covers a broad range of services, showing versatility and expertise.

Weakness

The layout is text-heavy and could overwhelm users, making it harder to scan or navigate.

Recommendation

Break down services into clear categories (e.g., "HR Outsourcing" and "Project-Based Services") and use icons or visuals for each service to make content more scannable and visually appealing.

Content Audit (Contact Page)

zzzzzz

Key Message

Provides a contact form, address, and phone number.

Strengths

All necessary contact information is provided, making it easy for users to reach out.

Weakness

Minimal design with no engaging prompt; could feel overly basic.

Recommendation

Making sure the form is user-friendly and optimized for mobile. Potentially adding a brief, inviting message above the form (e.g., "Looking for HR support? Let's get in touch!") to make it more welcoming and engaging.

Content Audit (Other Websites)

Impact HR

Strengths:

Clean layout, simple navigation, and strong CTAs like “Schedule a Consultation.”

Takeaway:

Effective use of navigation and CTAs for guiding user actions.

Humani HR

Strengths:

Modern, people-centric design with icons and testimonials that build trust.

Takeaway:

Icons and client testimonials make services more relatable and scannable.

HSP Group

Strengths:

Extensive information, strong global expertise branding, and multiple CTAs

Takeaway:

Good use of case studies and CTAs

Tree Testing

Execution

2 Participants completed tasks related to website navigation, such as "Find information about HR consulting services." (Tested from Optimal Workshop)

Goal

Evaluate the website's navigation flow and identify areas for improvement.

Participants completed study

Tree Testing

1. You want to know more about Insight HR and its approach to HR consulting. Where would you go?

2. Your business is considering HR consulting support, and you want to learn more about the specific services Insight HR provides. Where would you look?

3. You want to schedule a consultation with Insight HR. Where would you go?

4. You're interested in support for a specific HR project, like a leadership development program or employee engagement survey. Where would you go to find more information about these project-based HR services?

Tree Testing

Navigation Feedback

One participant described the navigation as "**Difficult**," and another rated it as "**Neutral**."

Insight

While users can complete tasks, the navigation feels **unintuitive**, potentially impacting overall satisfaction.

Section Labeling Feedback

A participant expressed **uncertainty** about whether certain information belonged under "Services" or "About."

Insight

This highlights ambiguity in section structure and labeling, suggesting a need for clearer distinctions and improved organization.

Content Feedback

A participant found the content "**too wordy**" and lacking specific details about services.

Insight

Simplify the language and provide concise, targeted descriptions for each service to make the **content clearer** and **more engaging**.

Key Findings

AREAS FOR IMPROVEMENT

Simplify language, clarify section labels, and make service descriptions more specific

ACTIONABLE CHANGES

Reorganize "Services" and "About" sections to reduce ambiguity and improve user flow.

Comparative Analysis

Goal

Identify design and usability improvements for Insight HR with **Impact HR, HSP Group, and Humani HR.**

Comparative Analysis

Layout and Visual Hierarchy

- Impact HR: Clean, minimalistic.
- Humani HR: Modern with icons, scannable.
- HSP Group: Dense, uses visuals for balance.
- Insight HR: Lacks engaging visuals, needs a clear hierarchy

Recommendation

Using icons and a more organized layout to improve content accessibility

Comparative Analysis

Navigation, Engagement Features, and CTAs

- Impact HR: Simple, strong CTA, user-friendly.
- Humani HR: Well-organized, frequent CTAs, includes testimonials.
- HSP Group: Dense; can overwhelm, Multiple CTAs; some might be excessive.
- Insight HR: Simple, but lacks a prominent CTA, lacks engagement features

Recommendation

Adding a **clear CTA** (like “Get Started”) to improve user guidance and testimonials to boost credibility and engagement with Insight HR

Comparative Analysis

Branding and Tone

- Impact HR: Professional, local expertise.
- Humani HR: Friendly, people-focused.
- HSP Group: Formal, corporate.
- Insight HR: Clear but could be more relatable

Recommendation

Adopt a more friendly, relatable tone, similar to Humani HR, to connect with small business clients

Key Findings

**Use icons and
visuals to make
services scannable.**

**Add consistent CTAs
on each page (e.g.,
“Contact Us,” “Get
Started”).**

**Incorporate client
testimonials for
trust-building.**

**Aim for a more
friendly, people-
centered tone.**

**Thank You
for Watching**
